

TRELICA BY 1PASSWORD

# A complete solution for SaaS access governance

Discover and secure your employees' access to SaaS apps—whether they are company managed or unmanaged. Gain clearer insights into SaaS usage, optimize SaaS spend, and streamline access workflows—all while strengthening compliance and security for your organization.

---

# Why businesses need Trelica by 1Password

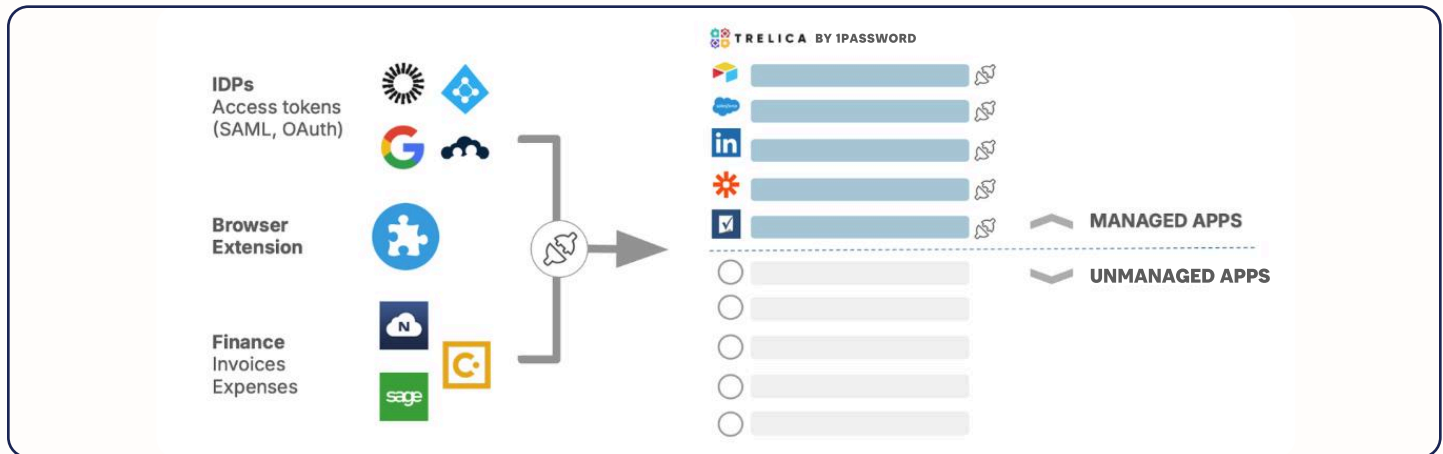

Modern SaaS management is complex. Shadow IT creates security gaps, unmanaged permissions introduce compliance risks, and IT teams struggle with manual processes for provisioning, offboarding, managing licenses, and tracking SaaS spend.

Trelica by 1Password solves these challenges by providing deep visibility, automation, and actionable insights—helping businesses reduce risk, streamline operations, and optimize SaaS investments.

Challenge	Trelica by 1Password Benefits
App blind spots	Uncover SaaS apps employees are using, both managed and unmanaged applications, with continuous app discovery.
App risks	Improve app security with app security reports and by identifying and revoking risky OAuth permissions, protecting company data.
Unnecessary spend	Optimize software investments by identifying unused licenses and redundant applications, driving significant cost savings.
Employee friction	Enhance user experience with a self-serve app hub, ensuring employees can access approved tools and request new tools quickly and securely.
Compliance risks	Maintain the right level of access to apps while supporting compliance standards such as SOC2 and ISO 27001 with a system of record for your app inventory, and employee lifecycle workflows.
Inefficient IT workflows	Increase efficiency with automated workflows for provisioning, deprovisioning, notifications, task management and more, reducing workloads and improving productivity.

# How Trelica by 1Password works

Trelica by 1Password integrates seamlessly with your existing security stack, providing visibility, security, and automation across your SaaS ecosystem.

**1**

## Discover

Trelica by 1Password helps you identify both managed and unmanaged SaaS apps through integrations with your finance systems, your Identity Provider, and a browser extension. It builds you a complete and always up-to-date inventory with insights from a database of 40,000+ apps, helping you uncover Shadow IT and track usage.

**2**

## Control

Trelica by 1Password ensures users have the right access at the right time through automated, configurable onboarding and offboarding workflows. With over 350+ direct app integrations, you can continuously update access permissions based on role changes and departures, saving time, minimizing risk, and strengthening compliance.

**3**

## Optimize

Trelica by 1Password analyzes SaaS usage and spend to highlight redundant licenses and cost-saving opportunities. It streamlines the renewal processes and automates deprovisioning, helping reduce waste and improve efficiency.

# Core features

## SaaS Discovery & Insights

Uncover all managed and unmanaged SaaS apps with automated discovery and detailed insights.

- Automated SaaS discovery via:
  - Identity Providers (OAuth, SAML, SWA)
  - Finance system spend data analysis
  - Browser extension
- Pre-populated app profiles (40,000+ app library)
- App inventory including custom roles & attributes
- App security reports (SOC2, ISO27001 etc.)
- 350+ direct app integrations

## Lifecycle management

Simplify user access governance with powerful provisioning, deprovisioning, and granular workflow controls.

- Discover & revoke risky OAuth tokens
- Self-serve employee App Hub
- Configurable access approval chains
- Slack integration for requests & approvals
- Automated user provisioning & deprovisioning
- Granular workflow actions (file transfer, email direct etc.)
- Device actions in workflows (lock, wipe etc.)

## License & Spend Optimization

Optimize SaaS investments by tracking license usage, managing and collaborating on renewals, and identifying cost-saving opportunities.

- AI-powered data extraction for contracts & renewals
- License entitlement tracking
- Renewal calendar & reminders
- Contract file upload & storage
- Spend reports with drilldowns
- Utilization & savings analysis
- Automated license reclamation
- Multicurrency and conversions
- App owner role & views
- User assessments & surveys

## Automation & Workflows

Streamline processes with a no-code workflow builder, app-specific actions, and powerful automation capabilities.

- No-code workflow builder
- 50+ generic actions (filter, wait, branch etc.)
- Hundreds of app-specific actions
- API webhook triggering
- Custom API calls
- Slack & Teams integration for messaging & interaction
- ITSM task syncing
- Raise and track tasks
- Email, Slack & Teams notifications

## Asset Management

Keep track of physical assets, from employee laptops and phones to networking equipment.

- Physical asset register
- MDM integration & asset syncing
- Local software discovery

The screenshot shows the 'Applications' page in the Trelica interface. It features a search bar, a 'NEW' button, and a dropdown for 'Business apps'. Below these are filters for 'Your apps', 'Status (5)', 'Users', and 'Spend', along with a 'More filters (1)' button and a 'Clear' button. The main content is a table with 53 apps, showing columns for Application, Users, Spend, Sources, Owner, and Status. The table lists various applications like Asana, Box, Confluence, Microsoft 365, Slack, Smartsheet, Zoom, Okta, and Workday Human Capital, each with its respective user count and spend.

Application	Users	Spend	Sources	Owner	Status
Asana	451	\$46.3K		RB NC	In review
Box	451	\$0		+	Managed
Confluence	451	\$15K		EC	Accepted
Microsoft 365	451	\$256K		+	Managed
Slack	451	\$83.5K		+	Managed
Smartsheet	451	\$86.5K		+	In review
Zoom	451	\$67.4K		+	Managed
Okta	350	\$0		+	Managed
Workday Human Capital	350	\$0		+	Managed
Culture Amp	280	\$0		+	Accepted

# Unmatched capabilities of Trelica by 1Password

## 350+ API integrations & custom workflows

With hundreds of direct API integrations combined with robust workflow automation, Trelica by 1Password gives you more visibility and control over your SaaS ecosystem.

## Automated access governance

Streamline employee lifecycle management with flexible, customizable workflows that automate SaaS access provisioning and deprovisioning. Ensure all apps, whether managed or discovered, are accounted for.
